

Coralee Jones @ 1171 Matianuck Ave, Windsor, CT

The availability for people of CT to have access to a good supply of clean water not only for today but for the future is a major priority. The residents of the MDC towns are extremely concerned about the arrangement that Bloomfield but more importantly the MDC made with Niagra.

CT and Bloomfield were easy targets for Niagra. As a State, we need to establish regulations that will prevent water bottling companies from taking our water out of state especially under drought conditions.

The MDC bent over backwards to make a deal with Niagra that was extremely beneficial to the profits of Niagra.

Niagra needs separate spring or aquifers to mix with the MDC water. The amount of water they need would surely lower local water tables and negatively impact residents and farmers to access enough water or drinkable quality of water.

Niagra will be lobbying for their benefit. Please Google to see what has been going on with Niagra and Nestley Companies around the country and see the harm they have done to other towns/states.

Please support the bills being presented.

Thank you for your support in this matter.
